

**Committee on Administrative Justice and Tribunals
Meeting 17 December 2013**

Paper 1.3

Discussion - Potential further membership

The aim is for the Committee to have a membership that provides skill, expertise and experience from a number of different backgrounds and perspectives, in order to allow for balanced and well informed contribution from the Committee. The aim therefore is that membership should strike a balance between:

- user perspective
- advice providers
- decision makers
- experts/academics

Members are asked to consider what additional skills and expertise that are not currently represented would be of benefit to the committee, and whether additional members should be invited.
